FEMUTEC becomes

 **simufact**

Dedicated to manufacturing processes, FEMUTEC has continuously improved and enhanced the highly specialized and practice-oriented software „Simufact.forming“, which is based on its predecessor MSC.Manufacturing.

“Simulating Manufacturing” has not only been our motto for years but also our heartbeat and the sole motivator of the company. The complete simufact product line represents this.

In order to communicate our philosophy directly with the company name, it is a logical step that FEMUTEC becomes Simufact. The new branding will be implemented in all departments, to align all with our vision of “Simulating Manufacturing”.

The new company name “Simufact” highlights the established software products, which are bringing a revolution to the forming industry.

“Simufact” stands for quality, high performance and innovation.

**We are now “Simufact”!**
